Tournament winner **Dennis Waterman** played confident master chess throughout, fully meriting the top honors. Here is his last round encounter with **Jeremy Silman** of Chula Vista, recorded in USCF approved coordinate chess notation (files lettered "a" to "h", ranks numbered "1" to "8", always counting from White's lower left corner regardless of whose turn to move; pawn captures designated by file letters only):

White: Jeremy Silman (2276). Black: Dennis Waterman (2272). remont, June 16, 1974. CHESS OLYMPICS IN FRANCE

Sixteen teams out of 73 starters have reached the finals of the 1974 Chess Olympics in Nice, France. The Soviet Union is favored heavily to win the round-robin competition, with the United States a powerful contender for second.

White: Boris Spassky (USSR). Black: David Levy (Scotland).

10 0-0	C-N1(a)		

(Notes by international master **Yuri Razuvayev**, translated from "64", No. 24, June 14-20, 1974, pg. 8)

(a) Although it is difficult to criticize such an opening authority as Levy, his last move does seem suspect. Undoubtedly better are the usual continuations, 10...R-B1 and 10...Q-R4.

(b) Probably a theoretical novelty, replacing the standard 11...R-B1.

(c) An abortive tactical operation, but 12...NxN also fails against 13 BxB NxKB 14 PxN KxB 15 P-R5 NxRP 16 QR-N1 K-R1 17 Q-N5. An improvement for Black in this line would be 13...KxB! 14 QxN P-QN4 15 B-Q5 P-N5! 16 N-K2 P-K4! 16 Q-Q2 NxB 17 QxN B-K3, with counterchances, but White can vary by 14 P-R5.

(d) Too late. Black tries to get his queen back in the game.

(e) Or 16...RxB 17 PxP QxB 18 Q-R6, etc.

(f) If 17...P-KN4, then 18 N-B6ch suffices to win.
